

CLASS 8 - CHEMISTRY
CHAPTER: NATURE OF MATTER
OMR TYPE QUESTION PAPER

1. Matter is anything that:

- ☐ (A) Has only colour
☐ (B) Has mass and occupies space
☐ (C) Produces light
☐ (D) Can be seen with naked eyes

3. Matter is made up of very small:

- ☐ (A) Cells
☐ (B) Particles
☐ (C) Organs
☐ (D) Tissues

5. Which state of matter has a definite shape and definite volume?

- ☐ (A) Solid
☐ (B) Liquid
☐ (C) Gas
☐ (D) Vapour

7. Which state of matter has neither a definite shape nor a definite volume?

- ☐ (A) Solid
☐ (B) Liquid
☐ (C) Gas
☐ (D) Ice

9. The particles in a gas are generally:

- ☐ (A) Very closely packed
☐ (B) Fixed in position
☐ (C) Far apart
☐ (D) Completely stationary

11. The force of attraction between particles is weakest in:

- ☐ (A) Solids
☐ (B) Liquids
☐ (C) Gases
☐ (D) All states equally

13. Which process demonstrates the movement of particles in matter?

- ☐ (A) Diffusion
☐ (B) Freezing
☐ (C) Melting only
☐ (D) Solidification only

15. Diffusion takes place fastest in:

- ☐ (A) Solids
☐ (B) Liquids
☐ (C) Gases
☐ (D) All at the same rate

2. Which of the following is matter?

- ☐ (A) Air
☐ (B) Sound
☐ (C) Light
☐ (D) Heat

4. Which of the following is NOT a characteristic of particles of matter?

- ☐ (A) They are very small
☐ (B) They have spaces between them
☐ (C) They are always motionless
☐ (D) They attract one another

6. Which state of matter has a definite volume but no definite shape?

- ☐ (A) Solid
☐ (B) Liquid
☐ (C) Gas
☐ (D) Vapour

8. The particles in a solid are:

- ☐ (A) Very far apart
☐ (B) Closely packed
☐ (C) Completely free to move
☐ (D) Absent

10. The force of attraction between particles is strongest in:

- ☐ (A) Solids
☐ (B) Liquids
☐ (C) Gases
☐ (D) All states equally

12. The continuous movement of particles of matter is called:

- ☐ (A) Diffusion
☐ (B) Particle motion
☐ (C) Evaporation
☐ (D) Condensation

14. The spreading of perfume smell in a room is an example of:

- ☐ (A) Melting
☐ (B) Diffusion
☐ (C) Freezing
☐ (D) Condensation

CLASS 8 - CHEMISTRY
CHAPTER: NATURE OF MATTER
OMR TYPE QUESTION PAPER

16. When a substance is heated, the movement of its particles generally:

- (A) Decreases (B) Increases
(C) Stops (D) Becomes zero

18. Which process changes a liquid into a solid?

- (A) Melting (B) Freezing
(C) Evaporation (D) Boiling

20. Which process changes a gas into a liquid?

- (A) Melting (B) Evaporation
(C) Condensation (D) Freezing

22. Gases can be compressed because:

- (A) Their particles are very large
(B) There are large spaces between their particles
(C) Their particles do not move
(D) They have no mass

24. Solids have a fixed shape because their particles:

- (A) Are widely separated
(B) Are closely packed and strongly attracted
(C) Move freely in all directions
(D) Have no forces between them

26. Which observation proves that particles of matter have spaces between them?

- (A) Sugar dissolves in water without a large increase in volume
(B) Ice melts
(C) Water boils
(D) A stone falls

28. On cooling a substance, the kinetic energy of its particles generally:

- (A) Increases (B) Decreases
(C) Becomes infinite (D) Remains unchanged

30. Which statement correctly explains the nature of matter?

- (A) Matter consists of particles that are continuously moving and have spaces between them
(B) Matter consists of particles that are always stationary
(C) Matter has no spaces between particles
(D) Matter is made only of visible substances

17. Which process changes a solid into a liquid?

- (A) Freezing (B) Melting
(C) Condensation (D) Evaporation

19. Which process changes a liquid into a gas?

- (A) Condensation (B) Freezing
(C) Evaporation (D) Melting

21. Which of the following can be compressed most easily?

- (A) Solid (B) Liquid
(C) Gas (D) Ice

23. Liquids can flow because their particles:

- (A) Are completely fixed (B) Can move past one another
(C) Have no attraction (D) Are very far apart

25. When sugar dissolves in water, the sugar particles:

- (A) Disappear
(B) Occupy spaces between water particles
(C) Change into water
(D) Become gases

27. Which statement about particles of matter is correct?

- (A) Particles are always at rest
(B) Particles have spaces between them
(C) Particles have no attraction
(D) Particles are visible to the naked eye

29. Which example shows that air occupies space?

- (A) An inflated balloon occupies more space than an empty balloon
(B) Air has no particles
(C) Air cannot move
(D) Air has no mass
